GO!

Gotta catch 'em all!!

# Land Law

## Problems

- Students find it archaic
- Students find it boring
- Students find it irrelevant

# Land Law

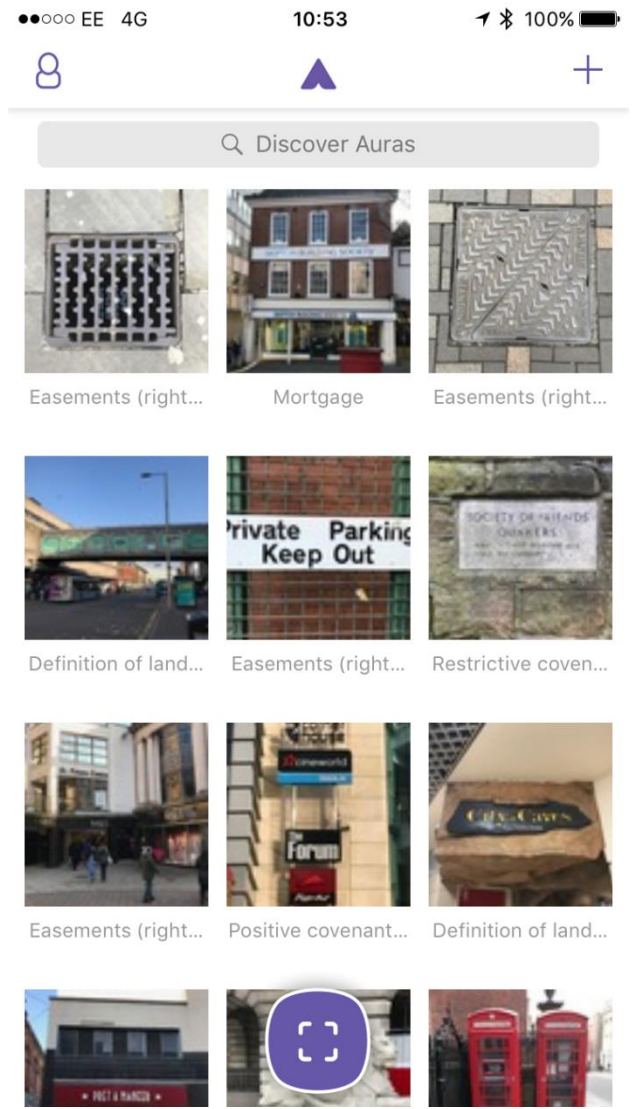

## Solutions?

- Emphasise the tactile nature of real property
- Illustrate it's importance to society and commerce
- Make it relevant by applying the law to real situations relevant to students

# **3 Steps to creating AR using the Aurasma app**

**STEP 1:** Download the free Aurasma app on iOS or Android

AURASMA

## STEP 2: Create an account

- You'll need:
  - an email address
  - a user name
  - a password
- You will then be taken to the 'Discover Auras' screen
- There are links to 3 screens:
  - Profile (top left of screen)
  - Discover Auras (top middle of screen)
- Create an Aura (top left of screen)

## **STEP 3: Create an Aura.**

- Take a photo of an object. This will be the trigger for your Aura.
- Choose an overlay from the Library or create your own with your camera (it can be either a photo or video). The overlay will be the AR element that will be displayed when the Aura is triggered.
- Name your overlay. You'll have an opportunity to reposition your overlay if you wish on the next screen.
- Choose a channel (a collection of your Auras) or create a new one, and decide whether to make it private or public.
- Showcase and share your Aura via email and social media

# Aurasma Studio

## GET STARTED

Log in to your Aurasma Studio account.

# Do's and Don'ts

## Do

- Choose an object that is framed well
- Choose an object that is permanent
- Make your overlay video short and punchy
- Choose a trigger location that is public or easily accessible

## Don't

- Choose a live, moving object
- Choose an object that is temporary
- Make your overlay video long and boring
- Choose a trigger location that is private or dangerous

# Further suggested uses of AR in Legal Education

- Interactive documents (eg voice annotated contracts)
- Interactive court rooms (eg guided court tour)
- Interactive case studies (eg site inspections, forensic crime scene investigations)
